

DC Power Supply

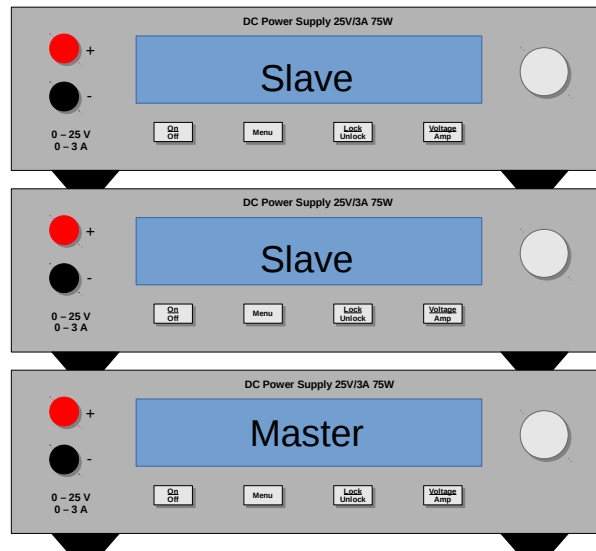

Board Architecture

Front Panel

Stackable Housing

Example configuration (3 units)

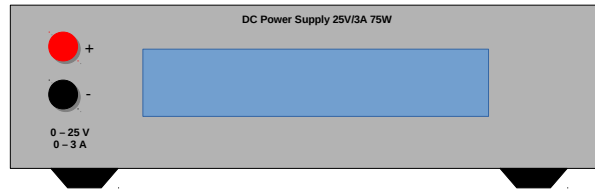

Serial linkage: 0-75V, 0-3A

Parallel linkage: 0-25V, 0-9A

To obtain higher voltage or current output the units can be linked together via LAN/LXI for control by master unit. The front panel controls of the slave units will automatically lock and sync with the master unit.

NOTICE: Linking increases noise for each unit added.

Headless Variant

No front controls
Remote control only (tablet, PC, etc.)
